Education

University Ibn Khaldun, Bogor

Bachelor's degree, Informatics Engineering GPA 3.65 of 4.00

RELATED EXPERIENCES

- **Mobile & PC Software Technician — Freelance (2021-Present)**
  Experienced in smartphone software repair, including rooting, bootloader unlocking (UBL), pattern/PIN/password bypass, firmware flashing, and FRP bypass. Skilled in troubleshooting both Android and iOS systems using a variety of tools such as ADB, Fastboot, and SP Flash Tool. Proficient in operating system installation for laptops/PCs including Windows, Linux, and Hackintosh, as well as installing essential software like Microsoft Office and supporting applications. Committed to maintaining data security and customer privacy throughout every repair and installation process.

- **Programmer Intern — PT. Qelopak Teknologi Indonesia (2020)**
  As a backend developer and almost full-stack intern, I was responsible for the development of a hospital website using Laravel for backend and Bootstrap for frontend. My tasks included implementing key features such as patient management, appointment scheduling, and user authentication. I also managed MySQL databases, optimized queries, and performed debugging to enhance system performance. Working closely with the team, I ensured the website was responsive, functional, and met all requirements.

- **Backend Developer (Mobile & Website) — Badan Pusat Statistik (BPS) Kabupaten Bogor (2025)**
  Worked as a backend developer for both mobile and web platforms using Laravel. Responsible for developing and maintaining RESTful APIs to support guest management systems for both PST and non-PST visitors. Integrated Synology NAS as a centralized file storage and automated backup solution to improve system reliability and data security. Collaborated closely with the internal IT team to ensure system performance, scalability, and deployment efficiency.
